

COVID-19 Information

We are aware of the global pandemic that is taking place. During these president times, we are doing our due diligence to make sure that your child's safety and our safety comes first. Every moment matters and will be cleaning, sanitizing and disinfecting around the clock. Below you will find the measures that we have put in place.

Screening

Prior to anyone entering the building their temperatures will be taken and will be written down in a log book. Prior to the arrival of the children parents will be required to call in and they will be asked a series of questions. If the child is deem fit to come, they will be allowed to enter, have their temperature taken and wash their hands immediately. If the child is not able to come in, they will be required to remain home until they are able to return. If your child displays any symptoms, we ask that you refrain from bringing them until they are symptom free for 24 hours. If your child displays any symptoms while in our care, they will be placed in another room with supervision so they are able to self-isolate. Should that happen parents will receive a call and will be asked to pick them up.

Clean and Disinfecting

We are routinely cleaning and disinfecting surfaces and objects. These surfaces and objects are ones that are frequently touched, especially toys and games. This also includes the cleaning objects and/or surfaces that are not ordinarily cleaned daily. Such as doorknobs, light switches, sink handles, countertops, nap pads, toilet training potty, and chairs.

*Please note that all cleaning materials will be secure and out of reach of children.

Clean and Sanitize Toys

Cleaning and sanitizing toys will be one of the main priorities throughout the day. The toys that children have placed in their mouths or that are otherwise contaminated will be set aside until they are cleaned. These items will be cleaned with water and soap, rinsed, and then sanitized with a disinfectant. After they have been disinfected, they will be rinsed again, and then set to air-dry. The toys that have been soiled will be set aside and placed in a dish pan with soapy water or put in a separate container marked for “soiled toys.” While the toys are being sanitized and air drying the children will have enough toys to play with so that the toys can be rotated through cleanings.

Clean and Disinfect Bedding

We will be using bedding such as (sheets, pillows, and blankets) that can be washed. Each child’s bedding will be separate, and will be stored in individually labeled bins, or bags. Cots and mats will be labeled for each child. Bedding that touches a child’s skin will be cleaned weekly or before use by another child. As the child wakes up the beds that the children are sleeping on will be wiped down and disinfected and left to air dry. Once they are completely dry, they will be put away.

Healthy Hand Hygiene Behavior

Hand washing is extremely important during these times. It is key to wash hands with soap and water for at least 20 seconds. Alcohol-based hand sanitizers with at least 60% alcohol can be used if soap and water are not readily available. We will be assisting children with handwashing, including infants who cannot wash hands alone. After assisting children with handwashing, staff will also wash their hands.

All children, staff, and volunteers should engage in hand hygiene at the following times:

- Arrival to the facility and after breaks
- Before and after preparing food or drinks
- Before and after eating or handling food, or feeding children
- Before and after administering medication or medical ointment
- Before and after diapering
- After using the toilet or helping a child use the bathroom
- After coming in contact with bodily fluid
- After handling garbage

We want to thank you for intrusting your children with us! We will do our best to keep everyone safe. While we do our part here, we ask that you do the same as well. Please stay home if you and/or your child are unwell and displaying any symptoms. It is important to stay safe so we can all remain healthy.

Thank you,

TeenyTyni Childcare Management
